Barcelona School of Economics

This document summarizes student evaluations of my teaching as a teaching assistant (TA) in three graduate courses at the Barcelona School of Economics (BSE). Category ratings use a **1–5 scale, with 5 the highest**. My scores appear in **bold**, with the BSE TA averages reported in parentheses. For each course, I report the evaluations by category, following the original reports, and the corresponding averages. Finally, I report the average ratings from student comments, which include numerical scores in addition to written feedback (available in the original reports).

Advanced Microeconomics II. I was the TA for Prof. Antonio Penta in 2022–23 (19 responses) and 2023–24 (17 responses). Across the two years, my average ratings were Satisfaction **4.81/5** (BSE 4.06), Lecturehours **4.90/5** (BSE 4.06), Engages **4.86/5** (BSE 4.26), and Content Evaluation **4.54/5** (BSE 4.37), exceeding the available 2022–23 BSE TA benchmarks in all four categories.

The two-year average was **4.77/5** (BSE: 4.19/5), while the two-year average evaluation in the comments was **9.76/10** (8 and 9 comments, respectively).

Brush-up in Advanced Mathematics. I was the TA for Prof. Alexander Frug in 2022–23 (13 responses) and 2023–24 (8 responses). Across the two years, my average ratings were Satisfaction **4.42/5** (BSE 3.84), Lecturehours **4.38/5** (BSE 3.84), Engages **4.76/5** (BSE 4.12), and Content Evaluation **4.88/5** (BSE 4.41), exceeding the BSE TA benchmarks in all four categories.

The two-year average was **4.61/5** (BSE 4.05/5), while the two-year average evaluation in the comments was **9.25/10** (4 and 3 comments, respectively).

Advanced Econometric Methods II. I was the TA for Prof. Christian Brownlees in 2021–22. My ratings (15 responses) were Satisfaction **4.60/5** (BSE 4.13), Lecturehours **4.47/5** (BSE 4.11), Engages **4.50/5** (BSE 4.34), and Content Evaluation **4.64/5** (BSE 4.40), exceeding the BSE TA averages in all four categories.

The average was **4.55/5** (BSE 4.25/5). No Professor Comments were reported for this course.

Andrea has been brilliant this term.	10
Andrea was great at making concepts in Game Theory clearer to us and you could really see that he knows his stuff. He was a bit tough at grading Problem Sets, in my opinion. There are question in problem sets (like the min max one), which are too hard and we sat many hours in front of them, just to get many points deducted at different stages of the proofs. In that case, I think it would be better to deduct some points once and then leave it (for those super hard questions).	8
Best Ta ever. His lectures were really useful. He puts a lot of effort on it	10
Thank you, Andrea, for the effort and for the refreshing lecture material	10
Very good TA, put in a lot of effort in preparing the classes and that showed. I appreciated that he tried to integrate the theory with the problem sets, definitley helped both further our understanding and make the TA classes more interesting. Always answered any emails very promptly.	10
Very good, Andrea did a great job, invested a lot for this T.A and we could feel it.	10
Well prepared and very useful TA sessions.	10
Well prepared, helpful summaries and really knowledgeable in the topic. I liked the approach of giving thematic summaries and tying the PS into what we have learned. TA sessions were quite helpful for my understanding.	10

A big thank you for helping us pass this course. One short comment to keep in mind, just because we were able to solve the problem sets in groups does not mean that each member necessarily understood everything so there may be merit in solving some more questions (at least all the tough ones).	4
Amazing TA sessions, very well structured and crystal clear. The grading of problem sets was a bit harsh though, compared to other TAs.	5
Andrea is excellent! He made a very difficult subject much more manageable.	5
Best TA ever had. Nothing to say about him. Everything perfect	5
Excellent TA! Understanding the course was getting tough, he decided to change the teaching process in the run, going for a more "recap on the theory" style. And he managed it very well. Also, he provided 1-1 time, and was very fast responding questions in google chats.	5
fantastic ta!	5
He is an amazing TA. He changed his way of teaching half way to meet the needs of the class, and I really appreciated it. He explains concepts very clearly and he is very patient.	5
I believe Andrea is an outstanding TA. He consistently provided a clear plan for the TA sessions and prioritized addressing our needs, rather than solely focusing on going through the solutions of the problem sets. Additionally, his comprehensive review session was incredibly useful in clarifying the topics for us.	5
The best-prepared TA we had so far. Also a good person.	5

.	4
He did a very good job. Very clear and helpful.	5
I think one of most helpful TA. A good mix of extra theory and exercises. Moreover, it is clear that there is a lot of work below his TA class	5
Slow down a little. Try and provide some more structure on the whiteboard	3
